SUMMARY

Computer Science & Engineering Graduate from North South University with hands-on experience in **frontend development, Flutter mobile apps, machine learning, and database systems**. Built scalable web and mobile applications and developed ML pipelines for real-world datasets. Experienced in **JavaScript, SQL, Flutter, and Git**, with a strong focus on **performance optimization, UI/UX design, and problem-solving**. Interested in contributing to **innovative software and AI-driven solutions**.

CORE SKILLS

- **Programming & Development:** HTML5, CSS3, JavaScript, Java, SQL
- **Frameworks & Technologies:** Flutter, Firebase, Git/GitHub, REST APIs
- **Artificial Intelligence & Data:** Machine Learning, Data Preprocessing, Feature Engineering, Pandas, Scikit-learn
- **Database Systems:** MySQL, NoSQL, Database Design, Query Optimization
- **Tools & Technologies:** Github, Claude, XAMPP, Web Hosting, Cloudflare, Canva, VS Code, Adobe Photoshop, Illustrator
- **Design & UI/UX:** Figma, Canva, Prototyping, Responsive Design, Visual Branding

PROJECTS

FoodFeed – Flutter Mobile Application

- Developed a cross-platform Flutter application featuring a **social food feed and ordering system**.
- Designed **interactive UI components** to improve user engagement and navigation.
- Integrated **Firebase backend services** for real-time data handling and scalability.

Machine Learning Pipeline for Real-World Data

- Built an end-to-end ML pipeline including **data cleaning, preprocessing, and feature engineering**.
- Applied **supervised and unsupervised algorithms** to generate predictive insights.
- Improved model performance through **data transformation and optimization techniques**.

BB84 QKD Dual-Phase Exploit Research

- Designed and implemented a **dual-phase attack model** combining detector blinding and time-shift techniques.
- Conducted experimental validation on **quantum key distribution systems**.
- Identified **security vulnerabilities in quantum communication protocols**.

Doinik Bangla Kagoj – News Portal

- Developed a dynamic news platform with **real-time search, content management, and an admin dashboard**.
- Implemented frontend using **HTML, CSS, JavaScript,** and backend with **PHP & SQL**.
- Optimized performance and improved responsiveness across devices.

Hishab Nikash – Accounting System (Prototype)

- Designed a **web-based financial management UI prototype**.
- Focused on **usability, clean layout, and structured financial workflows**.

PROFESSIONAL EXPERIENCE

Junior Developer | 8bit Private Limited | Dhaka, Bangladesh **2025**

- Developed and maintained frontend components using **HTML, CSS, and JavaScript**.
- Contributed to projects including **Dainik Bangla Kagoj and Teriyaki Boyz platforms**.
- Improved **website responsiveness and performance optimization**.
- Collaborated with team members using **Git for version control and deployment workflows**.
- Assisted in integrating **APIs and backend systems**, expanding full-stack understanding.

LEADERSHIP & VOLUNTEERING

Graphics Designer | ICMA NSU Student Chapter **2023 – Present**

- Designed **marketing materials, banners, and social media content**.
- Enhanced **brand visibility and audience engagement** through creative visuals.

EDUCATION

Bachelor of Science in Computer Science & Engineering **Session**: 2021 – 2026
North South University

Higher Secondary Certificate (HSC) in Science **Passing Year**: 2020
Shaheed Police Smrity College

Secondary School Certificate (SSC) in Science **Passing Year**: 2018
Govt. Mohammadpur Model School & College

CERTIFICATIONS

- Database Design Challenge – NSU DB Hackathon
- Graphics Design (Adobe Photoshop & Illustrator) – Creative Troops
- Intermediate English Language Course – British Council

LANGUAGES

- **English** (Professional)
- **Bangla** (Native)

ADDITIONAL INFORMATION

- Strong interest in **AI, Scalable systems, Software architecture and SQA**
- Passionate about **UI/UX design, Graphics designing, Photography, Traveling and PC hardware building**
